

# Advita<sup>®</sup> Paste for Cattle

(penicillin G procaine suspension, 300000 units)

Contains a source of live (viable) direct fed microorganisms specifically designed for all classes of bovine species. Formulated to contain six active, micro-encapsulated cultures and pre-biotic fructooligosaccharides for the maintenance of a healthy microbial balance in cattle. Can be used daily as a nutritional supplement even during conditions of extreme weather changes, before and after antibiotic usage, and long travel periods. This product is restricted to the use by or on the order of a licensed veterinarian.

Product	Item#	Size
Advita Paste for Cattle	510073	60 g tube
	510074	300 g tube
