

(Levothyroxine Sodium USP 0.22%)

For use in horses for correction of conditions associated with low circulating thyroid hormone (hypothyroidism). Levothyroxine Sodium (T-4), a synthetic isomer of thyroxine, is used in veterinary medicine for treatment of hypothyroidism with predictable therapeutic results. Because it is highly palatable, ThyroVet™ Powder can be easily administered by simply adding to food. ThyroVet™ Powder can be administered by mixing the daily dose in the concentrate or by top dressing on the grain, preferably rolled or ground. To facilitate the proper adhesion of ThyroVet™ Powder to the ration, slightly moisten the grain with water or a liquid supplement.

ITEM#	DESCRIPTION	SIZE
510261	ThyroVet Equine Powder	1 lb Jar
510262	ThyroVet Equine Powder	10 lb Bucket

Each pound (453.6 g) contains:

- Levothyroxine Sodium USP 0.22% (1.0 g)
- One teaspoon contains 12 mg of T-4
- One tablespoon contains 36 mg of T-4
